

Riddle of the day: **I am an odd number. Take away a letter and I become even. What number am I?**

Hello year 6! I hope the weather hasn't dampened your moods and that you are keeping entertained at home.

Maths: Statistics

For maths today, you need to do pages 82, 83, 84 and 85 in your Maths SATS Questions Book. (The answers are on page 109.) The questions all involve looking at tables, pictograms, bar charts and line graphs, looking at the data to find the answers to the questions.

Here are some reminders and top tips:

- ★ Don't forget: the information you need to answer the question is there. You just have to look for it!
- ★ Read the answer at least twice so you understand what it is asking you to do. (You could circle the important information in the question.)
- ★ Remember: because there is 60 minutes in an hour, you cannot use column addition and subtraction to answer time questions. I recommend using a number line instead.
- ★ If you have tried and tried and you still can't answer a question, either message me for some clues or look at the answer and see if you can work out how to get there.

English - Writing a thank you letter to a hero!

You will almost certainly have heard about the amazing achievements of **Captain Tom Moore**, who has now raised **£29,460,839** for charity by walking 100 laps of his garden. He has inspired lots of others to do their own fund-raising lock down activities, whilst changing the lives of many with his amazing actions. He is also 100 years old today!

To remind us of how many heroes there are doing selfless acts for others, we are going to write a letter to one of them to say a great big **THANK YOU!**

Your hero does not have to be Captain Tom, it could be anyone who you think does something that deserves some recognition. It could be a family member or friend who is a Dr or nurse who works hard to look after people. Maybe you know someone who has been working hard in a supermarket to make sure the shelves stay stocked with the food we need, or you think your postman, or a delivery driver you know, would really appreciate a letter saying thank you. You might have a parent who is working from home whilst helping you with your learning and also keeping you safe and happy; there are so many everyday heroes all around us, whose day would be made by receiving a lovely letter of thanks.

In your letter, you need to explain why you think they are a hero and the impact their actions are having on others. You could write this on paper or on a Google Doc. I would love to see them if you would like to share them with me. **If your letter is to someone who you don't know, such as Captain Tom or someone well-known, I can post it to them if you put it through the post box at school.** (Only drop it off when you are out on your daily exercise - don't make a second trip out of your house.) **Just think of all of those people we can thank, if we all do a letter!**

P.E. Celebrating Captain Tom's 100th Birthday

To celebrate Captain Tom's big day, I challenge you to do 100 minutes of exercise today. You could do 10 x 10 minute sessions or do something involving the number '100' such as doing 100 laps of your garden. Photos would be welcomed!

It feels that there is a lot to do today, so I am not adding an extra activity here. If you need something else to do, you could do today's #DrawWithRob or use your watercolours to paint something of your choice.

The Tate Gallery <https://www.tate.org.uk/kids> has lots of online art games and quizzes to do and also has suggestions for art activities to do at home.

History: Investigating life in 1920

For history today I would like you to compare what life was like for an 11 year old 100 years ago with what life is like today. You could focus on a couple of areas such as school and hobbies. Or you could compare transport, food, clothes, the jobs people did, or the sorts of things you might find in a 1920's house. Just pick the areas of life that interest you the most.

Then, create a poster, Google doc or Google Slides presentation showing what you have found out about the differences between life when Captain Tom was born and life for you now. (Normal life: not lockdown life!) If you present your findings on Google doc/slides please can you share them with me.

Class book! The next installment of our story will be uploaded this afternoon.

How many of these classic books have you read?
