### Key Vocabulary

even  
odd  
multiple  
share  
equal

### Things to try

- Line up toys or teddies in twos
- Investigate odd numbers by trying to share them into 2 groups fairly
- Look at house numbers on your street, odd are on one side and even numbers on the other.
- If you have a calendar on the wall, you could mark the odd and even numbers on your calendar so children start to understand.
- Play sorting games with number cards.
- Play on Numbots.

### Top tips

The secret to success is practising little and often .

Use your time wisely.

Can you practise these KIRFs while walking to school or during a car journey?
